

## ABSTRACT

Mounting equipment comprises a brush (19) which brushes an edge portion of a liquid crystal cell (1) and removes the  
5 contaminating dust attached to this edge portion, an ionizer (28) for injecting an ionized gas toward a portion to contact at least the edge portion of the liquid crystal cell (1) of this brush (19), and a discharge pipe (31) provided within a cleaning case (21) for absorbing and removing the gas injected toward the brush (19)  
10 from this ionizer (28).
